## **GENERAL INFORMATION & REPORTS**

### [BARC Clubhouse Street Level Access](#)

The BARC Planning Group discussed and decided at its August meeting to offer a street level entrance for members often preferring not to have to climb up and down steps in order to attend BARC meetings, movie night and other Club activities.

A volunteer team of BARC members will take turns welcoming members and guests, who prefer street

level access, to enter at the Gym exterior entrance on the north side of the school near the rear corner (NE Corner). Someone will be at that door from apx 7:00-7:30 PM on regular meeting nights and movie nights. We will develop additional procedures for other activities. We don't want anyone not to attend Club meetings and activities because of the steps.

## [BARC 2017 Meeting Presentations](#)

BARC Program Coordinator Ken Moak KM8AM provides the following Schedule of Programs to be presented for the next several Club Meetings. (Scheduled programs are subject to change based upon the availability of the presenter.)

Aug: "Field Day Photo Review,"

A discussion on disposing of the trailer itself ensued. The group was reminded that BARC agreed to donate the trailer to a charity if it was no longer wanted/needed. BARC may also be interested in storing Field Day equipment/supplies in the trailer for ready transport to the park.

### **Repeater Site.**

- On-site Internet connections needs a better feed
- MESH node on tower postponed due to rain.
- Site owner may not put the existing site emergency generator into service until he erects a new building. Said building is currently in the planning stage. We may install our 4KW generator in the meantime.
- Antenna work: change out of two GCARES antenna and possibly one BARC antenna is needed. We need to determine the antenna height for the necessary feedline length

- WCOARA/BARC joint project discussed last month is currently being reexamined.
- 7/8 Hardline (300 foot) – Ken Moak may piggy back our hardline on another order he is placing.

**Rooftop Antennas.** Ken Moak reports that the roof resurfacing project is delaying the antenna project. Tar has been applied to the roof; the gravel may be applied by now but it must set for a period of time before accessing the roof. Henry will check with the School as to the timeline for roof access.
